PROFESSIONAL SUMMARY

Senior software engineer with a strong predilection for frontend technologies. Since 2013, I have been developing skills in creating a seamless user experience as well as result-driven, visually impressive responsive websites, portals, web apps, and mobile apps across all platforms. I also possess a good working knowledge of agile methodology, an excellent team playing spirit and great willingness & zeal to learn new things. Eager to use my knowledge and skills to fill the open position in your organization.

SKILLS & HIGHLIGHTS

- Educational background in ND & HND, Computer Science with Distinction & Upper credit respectively.
- Talented in syncing front-end & back-end applications while ensuring superior functionality & user experience.
- Skilled in consuming RESTful and GraphQL APIs for both front-ends (Web and Mobile).
- Proficient in API testing as well as good backend knowledge of the following languages such as PHP, NODE, Python & JAVA.
- Proven experience in mobile apps, responsive & interactive web development and code reviews.
- Proven record of security optimization with attention to details.
- Expertise in maintaining high coding standards, including ADA, and SOLID principle.
- Expert skills in providing team leadership to 15+ teams to motivate and guide them for development and growth.
- Capable of designing, coding application UI, debugging existing codes, & performing quality assurance tests.
- Proven experience increasing page speed, boosting web performance levels and general web app optimizations.
- Skilled in communication, problem-solving, adaptability, self-control, risk management, & persuasive speaking.
- Proficient in utilizing HTML5, tailwind/css3/bootstrap5/SCSS, JavaScript/Typescript, Reactjs/Nextjs, React Native, React- Query, Redux/Redux toolkit, Git/Github/Gitlab and more.
- Proficient in utilizing technologies like docker, Kubernetes, Jenkins and CI/CD tools for development, testing, debugging and deployment.
- Proven experience writing both unit tests using jest,e2e tests with cypress and react testing library to ensure product quality.
- Record of involvement in web application design from documented business requirements & quality assurance testing.

WORK EXPERIENCE

Lead Frontend Engineer | *Union Bank of Nigeria* *(Lagos, Nigeria)* **August 2021 – July 2025**

- Translated UI designs into reusable codes, while striking a balance between functional and aesthetic design
- Performed a detailed security optimization of all applications across board.
- I helped to increase the revenue by more than 200% on the M36 Investment app by taking ownership and subsequently designing and developing the admin module of the mobile version to engage more prospective customers.
- Building a new feature (Branch Teller) to onboard new transactions for both new and existing customers.

- Integration of external API to services from partners, I helped with customer KYC upgrades, Buying of Fixed Income products, customer credit reports, etc.
- Ensured brand consistency is maintained throughout the design while optimizing web pages for maximum speed and scalability.
- Performed detailed code reviews with peers to improve code quality.
- Providing technical support in every sphere of the development to subordinates**.**

Senior Software Developer (Frontend) | ***Riskgratis Technologies Limited*** *Lagos (Remote)* **Decemer 2019 – January 2021**

- Liaising with the team leads to understand the system, set roadmaps, and determine requirements.
- Creating and consuming RESTful API for reporting system.
- Building new modules, fixing bugs and timely updates on existing modules.
- Handling all websites related issues and performance optimization

Software Engineer | ***Boldlinks Technology Solution*** *(Lagos, Nigeria)* **October 2017 – November 2019**

- Collaborating with PMs and other Engineers to understand requirements and define technical feasibility.
- Contributing to the breakdown of complex features into smaller, manageable tasks.
- Participating in sprint planning and backlog refinement sessions.
- Developing reusable components and libraries.
- Implementing state management solutions (e.g., Redux, Zustand, Context API) as needed.

Software Developer | ***Syssoft Consultants Limited*** *(Lagos, Nigeria)* **September 2015 – Septemer 2017**

- Developing features to enhance the user's experience.
- Converting a wireframe to aesthetic design.
- Ensuring web design is optimized for smartphones.
- Building reusable code for future use.
- Troubleshooting and maintaining client's applications.
